Junhao JIAN, Jovian

DoB: Aug 2003 • Guangzhou, China • +852 84963816 • junhao.jian@outlook.com • Hong Kong Citizen (IANG)

EDUCATION BACKGROUND

Lingnan University Hong Kong SAR
Master of Science in Data Science Sept 2025 - Jul 2026
- **Cumulative GPA:** 3.63/4.0 (with Distinction)

Lingnan Normal University China Mainland
Bachelor of Science in Data Science and Big Data Technology Sept 2021 - Jul 2025
- **Cumulative GPA:** 3.37/5.0 (Top 10%)

WORK EXPERIENCE

Sansec Technology Co., Ltd *Overseas Technical Support Engineer* Aug 2026 – Present
- Handled full-cycle pre-sales for crypto solutions including the PQC migration platform: facilitated client meetings and commercial negotiations, delivered demos, prepared POC and solution documentation for Hong Kong, mainland and Southeast Asian clients to drive project wins.
- Provided on-site HSM/KMS post-sales support covering deployment, troubleshooting, inspection, firmware upgrades and critical incident resolution.

Tongcheng Travel Holdings Limited *Data Operations, Intern* Jul 2024 – Dec 2024
- Used pivot tables & SQL to extract and analyze hotel business data, completing efficient data visualization. Also managed daily O&M of the hotel's Purchasing, Sales, and Inventory (PSI) system, monitoring inventory in real-time and tracking material flow systematically.
- Represented hotels/OTAs in supplier negotiations for material procurement and outsourcing cooperation. Participated in the launch of the hotel room new retail project, and oversaw hotel project operations & IT coordination—translating business needs into technical solutions to boost customer order conversion rates.

PROJECT EXPERIENCE

Smart Contract Vulnerability Detection for HK Web3 Market *Team leader* Jan 2026 – Aug 2026
LLM Multi-Agent Systems, Smart Contract Analysis, Solidity
- Researched smart contract security for Hong Kong Web3 with supervisor, built an LLM multi-agent framework for automated vulnerability detection against common flaws including reentrancy, access control issues and integer overflow, benchmarking it against single-agent tools.
- Created vulnerable Solidity test contracts, optimized multi-agent workflows with task splitting and cross-agent verification to boost detection accuracy and lower false positives, supporting Web3 security in Hong Kong.

Social Media Sentiment Analysis System *Team leader* Oct 2024 – Apr 2025
Web Crawling, Sentiment Analysis, LSTM, Data Visualization
- Worked with my academic supervisor to process Weibo hot topic datasets, aiming to identify public sentiment trends and quantify user influence on social media platforms;
- Used Python (Requests) to crawl 89k+ data points (comments, likes, reposts), then cleaned and preprocessed data (Jieba segmentation, stopword removal) with Pandas. Built TextBlob-LSTM hybrid sentiment models via Python, and created interactive visualizations (engagement rate charts, word clouds) using Matplotlib.

SKILLS & AWARDS

- **Language Skills:** Cantonese(native), Mandarin(native), English(intermediate);
- **Professional Skills:** Python, C, R, Power BI, Tableau, MySQL, Hadoop, Solidity, Linux;
- **Awards:** Potential Award in the Smart City Field of the 2023 Beijing Artificial Intelligence Industry Large Model Innovation Application Competition; Outstanding Individual of Lingnan Normal University; Postgraduate Entrance Examination Scholarship; Excellent Intern in Professional Internship.
